

# OIL AND GAS

Lounsbury has been supporting exploration and development of Oil and Gas projects across the state for over five decades. We staked the discovery well for the Swanson River Oilfield on the Kenai Peninsula in the 1950's, helped build the giant Prudhoe Bay and Kuparuk Oilfields in the 1960's and 70's, and our survey crews supported the design and construction of the Trans-Alaska Pipeline.

Our fully staffed office at Kuparuk supports exploration and development projects 365 days a year. Our experience in surveying and engineering for oil and gas development leads to quality projects and advanced schedules.

*We continue to support new exploration and development of oil and gas projects into the 21st century.*

## Oil and Gas services include:

- Exploration Well Location
- Ice road Reconnaissance and Staking
- Permit Surveys / Support
- Pad and Piping Layout
- Material Site Development
- Well Pad and Access Road Designs
- Facility Design Surveys
- Construction Inspection
- Module Locations
- Pile Staking
- Pipeline Layout
- Hydrologic Surveys
- Final Right-of-way
